## Frontend & Mobile Engineer

Frontend developer with hands-on experience building production-ready apps for web and mobile. I focus on performance, reliability, and clean user experiences, whether refactoring complex systems, building real-time and offline-first features, or integrating AI-driven tools. I've worked on healthcare and pharmacy platforms, improving performance, fixing complex bugs, and adding smart features powered by AI. I enjoy working in small, collaborative teams where I can take ownership, move quickly, and ship work that truly helps people.

### WORK EXPERIENCE

#### Famsi Africa

03/2025 - Present

##### Product Engineer

Technologies: React Native, React, TypeScript, Zustand, Firebase, Tailwind CSS, Google Play Console, OTA Updates

- Sole developer for Famasi's Dispensary app, refactored from bare React Native to Expo, redesigned UI, and improved performance across Android and iOS.
- Integrated AI chat assistant that analyzes sales and inventory, reminds pharmacies to restock, and auto-generates procurement lists.
- Built offline-first ordering, enabling pharmacies to place and sync orders without internet connectivity.
- Refactored the Personal Pharmacy web app (famasi.africa), fixing order-flow bugs and ensuring consistent, reliable order completion.
- Implemented real-time order sync between web and mobile using sockets and push notifications.
- Developed the Famasi mobile app mirroring web flows with native features like push notifications and refined mobile UX.

#### Compre

01/2025 - Present

##### Mobile Developer

United States

Technologies: React Native, TypeScript, Zustand, App Store Connect

- Sole developer for Compre's dual-interface mobile app, connecting pharmacies and distributors in a B2B e-commerce ecosystem.
- Built and maintained both pharmacy and supplier experiences, covering end-to-end flows for product discovery, ordering, checkout, payments, and order tracking.
- Developed advanced inventory management tools, including bulk product uploads via CSV, powered by native WebSocket connections for real-time feedback and upload progress.
- Implemented secure ordering and payment systems, along with robust order management for both user roles including order updates, fulfillment, and status tracking.
- Managed the entire release pipeline, including testing, build distribution, and preparing submissions for both the App Store and Google Play Store.

#### Octosoft Technologies

08/2022 - 02/2024

##### Mobile Developer

Technologies: React Native, TypeScript, XCode, Android Studio, Push Notifications (FCM)

- Contributed to a React Native app for doctor-patient communication and health plan comparison.
- Led a major dependency update and performance overhaul for the mobile codebase.

## EDUCATION

### **B.Sc. Quantity Surveying, Second Class Upper**

University of Lagos

01/2016 - 01/2023

### **Diploma, Front-end Development**

AltSchool Africa

01/2022 - 01/2023

## SKILLS

- React
- React Native
- TypeScript
- JavaScript (ES6+)
- Next.js
- Tailwind CSS
- Redux
- Zustand
- Firebase
- REST APIs
- WebSockets
- Socket.io
- Expo
- OTA Updates
- Push Notifications
- App Store Connect
- Google Play Console
- Xcode
- Android Studio
- Figma
