

## SUMMARY

Product engineer with hands-on experience building production-ready apps for web and mobile. I focus on performance, reliability, and clean user experiences, whether refactoring complex systems, building real-time or offline-first features, or integrating AI-driven tools. I’ve worked on healthcare and pharmacy platforms, improving performance, fixing complex bugs, and adding smart features that enhance user engagement. I enjoy working in small, collaborative teams where I can take ownership, move quickly, and ship work that helps people.

## EXPERIENCE

### Famasi Africa

Product Engineer | Mar 2025 - Present

- **Sole frontend engineer** responsible for multiple production products across web and mobile, shipped and maintained under Famasi Africa.
- Built, shipped, and maintained the **Dispensary mobile app**, handling full [App Store](#) and [Google Play](#) release pipelines, OTA updates, and production support.
- Developed the **Famasi mobile app** ([App Store](#) and [Google Play](#)), the mobile version of the Famasi web platform originally built end-to-end, ensuring feature parity and mobile-first performance optimizations.
- Built and shipped the **August mobile app** ([App Store](#) and [Google Play](#)), managing end-to-end development, testing, and store submissions.
- Implemented **curated medication plans**, combining multiple products into a single purchasable flow with integrated payments and optimized checkout.
- Built and shipped **Famasi Wrapped**, a personalized, animated year-in-review feature using React Native and Reanimated.
- Integrated **Remi, an AI assistant** experience following Famasi Wrapped, using LiveKit to collect conversational user feedback on what a personal pharmacy means to them and inform product improvements.
- Deployed the **React Native Dispensary app to web** via Expo for Web and managed production hosting on DigitalOcean.
- Built and deployed **multi-tenant pharmacy storefronts**, handling subdomain provisioning, hosting, and production deployment for individual pharmacies.
- Built the **storefront configuration system** within the Dispensary app, allowing pharmacies to manage custom domains, branding (headers, colors), business details, and operating hours, and integrated this data into storefront rendering.
- Refactored legacy order flows in the Personal Pharmacy web app, fixing **critical checkout and payment bugs**.

**Technologies:** React Native, React, TypeScript, Expo, Zustand, Firebase, Cloudflare, PostHog, DigitalOcean, Tailwind CSS, Socket.io, App Store Connect, Google Play Console, Push Notifications, LiveKit.

### Compre

Mobile & Web Developer (Contract) | Dec 2024 - Present

- Built and maintained both **pharmacy and supplier experiences** on mobile, covering discovery, bulk ordering, payments, and order tracking.
- Implemented **deep linking** across the app, including links from push notifications and transactional emails.
- Built and maintained the distributor-facing **web application**, extending the existing mobile product to web with shared business logic and flows.
- Implemented **bulk product uploads** with real-time progress feedback using WebSockets.
- Integrated **push notifications** and **notification-driven navigation flows**.
- Managed **OTA updates**, testing, build distribution, and deployments to the [App Store](#) and [Google Play](#).

**Technologies:** React Native, TypeScript, Expo, Zustand, OTA Updates, WebSockets, Deep Linking, Push Notifications, App Store Connect, Google Play Console

### Octosoft Technologies

Mobile & Web Developer | Aug 2023 – Feb 2025

- Built **appointment reminder** and **real-time notifications**, ensuring users are alerted before and during scheduled consultations to reduce missed sessions.
- Led a **major dependency update** and **performance overhaul** for the mobile codebase, stabilizing the app and improving runtime performance.
- Developed a **health plan comparison marketplace**, enabling side-by-side evaluation of providers within the app.

**Technologies:** React Native, TypeScript, Swift, Java, Android Studio, XCode, Push Notifications (FCM, APNs), Native Modules

## EDUCATION

### University of Lagos — B.Sc. Quantity Surveying

Dec 2016 – Jul 2023

### AltSchool Africa — Diploma, Frontend Engineering

Jan 2022 – Feb 2023
