SUMMARY

Front-end Developer with 2+ years of experience in health tech. Skilled in React, React Native, and TypeScript, I enhance user experiences and optimize app performance. I excel in cross-functional team collaboration to deliver innovative features that boost user engagement and streamline healthcare processes. Dedicated to creating scalable, efficient, and user-centric applications that make a real impact in digital health.

EXPERIENCE

Octosoft Technologies | Frontend Developer
Mar 2023 - Present

Played a pivotal role in the development of multiple projects aimed at enhancing tools within the health tech sector, key contributions include:

- **React Native App Enhancement:**
  - Recently integrated a real-time native call feature, enabling users to receive incoming call alerts when a doctor joins an appointment.
  - Updated an outdated React Native codebase with new features and bug fixes.
  - Led a major dependency update project, involving a near-complete rewrite of the codebase.
  - Improved app performance and user experience through modernization efforts.

- **Health Plan Marketplace Development:**
  - Developed a user-friendly marketplace enabling users to compare health plans from various providers side by side.
  - Implemented filtering options based on price and coverage, enhancing the decision-making process for users.
  - Integrated a seamless purchase process via Flutterwave, ensuring users receive an email with a link to enter beneficiary details post-purchase.
  - **Live link**: https://www.octodoc.com/

- **Payment Aggregation Tool:**
  - Spearheaded the complete frontend development of a payment tracking and management portal for Health Maintenance Organizations (HMOs).
  - Integrated multiple payment providers (Flutterwave, GTSquad Pay, Wema Bank) allowing users to create and fund wallets directly on the platform.
  - Developed functionality for making payouts to healthcare providers, with options to download individual receipts or bulk documentation.
  - Streamlined financial operations for HMOs, resulting in improved payment visibility and management for clients.

Technologies: React Native, Next.js, TypeScript, Chakra UI, React Query, React Testing Library, Tailwind, Jira, Figma

PROJECTS

Mobann Technologies | Frontend Developer (Contract)
May 2024 - Sep 2024

Led the frontend development of a Learning Management System (LMS) for a DevOps training platform:

- Architected and implemented a responsive, user-friendly interface for course delivery, using React and TypeScript.
- Implemented a robust assessment module with various question types tailored for DevOps concepts evaluation.
- Created a real-time progress tracking system, allowing students to monitor their advancement through the curriculum.
- Ensured cross-browser compatibility and optimized performance for seamless user experience.
- Collaborated closely with backend developers to integrate RESTful APIs and WebSocket connections for real-time features.
