

SUMMARY

Product engineer building web and mobile products for healthcare, pharmacy and SaaS teams. I trained as a quantity surveyor, moved into frontend in 2022, and now take features from product decision to production with React, Next.js, React Native and TypeScript. I care about flows that make sense and about what users see when something goes wrong, and I work best in small teams where I can own the outcome.

EXPERIENCE

Trivalue

Frontend Engineer | Apr 2026 – Present

- Built **PineLeap's frontend from scratch** as the frontend engineer, owning the architecture and every core flow, and took it to **beta in six months** (Apr – Oct 2026).
- Built **authentication, onboarding, and access control** with role-based permissions.
- Built the core product: **goals, actions, conversations, meetings and resources**, plus user profiles.
- Built the **public visitor experience**: the booking pages, forms and links that bring people into the product.
- Implemented **Stripe billing and subscriptions** and **Google and Outlook calendar integrations**.
- Maintain the frontend of **Ezihub** and added **identity verification** with Veriff.

Technologies: React, Next.js, TypeScript, Tailwind CSS, TanStack Query, Zustand, Stripe

Compre

Mobile & Web Developer (Contract) | Dec 2024 – Present

- Built the **pharmacy and supplier mobile experiences**: discovery, bulk ordering, payments and order tracking.
- Built the **distributor-facing web app**, extending the mobile product to web with shared business logic.
- Implemented **bulk product upload** with real-time progress (WebSockets), **deep linking** from push notifications and emails, and **OTA updates** and App Store and Google Play releases.
- Contribute to **backend services**, using AI-assisted development.

Technologies: React Native, TypeScript, Expo, Zustand, WebSockets, Push Notifications, App Store Connect, Google Play Console

Famasi Africa

Product Engineer | Mar 2025 – Feb 2026

- Sole frontend engineer** across several production products on web and mobile.
- Shipped the **Famasi, Dispensary** and **August** mobile apps to the App Store and Google Play, including release pipelines and OTA updates.
- Built **multi-tenant pharmacy storefronts**: subdomain provisioning, custom domains, branding and opening hours.
- Built **Famasi Wrapped**, an animated year-in-review, and **Remi**, an AI assistant using LiveKit that collected conversational user feedback.
- Built **curated medication plans**: several products in one purchase flow, with payments and a shorter checkout.
- Refactored legacy order flows, fixing **critical checkout and payment bugs**.

Technologies: React Native, React, TypeScript, Expo, Zustand, Firebase, Cloudflare, PostHog, DigitalOcean, LiveKit

Octosoft Technologies

Mobile & Web Developer | Mar 2023 – Mar 2025

- Built **appointment reminders** and **real-time notifications** to reduce missed consultations.
- Led a **major dependency update** and **performance overhaul** of the mobile codebase.
- Built a **health plan comparison marketplace** for side-by-side provider evaluation.

Technologies: React Native, TypeScript, Swift, Java, Push Notifications (FCM, APNs), Native Modules

EDUCATION

University of Lagos | B.Sc. Quantity Surveying

Dec 2016 – Jul 2023

AltSchool Africa | Diploma, Frontend Engineering

Jan 2022 – Feb 2023
